

Scrollzea - Digital Products Marketplace

Scrollzea Development Team

July 29, 2026

Scrollzea — Digital Products Marketplace

Complete Platform Documentation

Version 1.0.0 | July 2026

1. Platform Overview

Scrollzea is a full-featured digital products marketplace built with Next.js 15, TypeScript, and Tailwind CSS v4. It enables businesses and creators to buy, sell, and discover ready-to-use digital products including website templates, mobile apps, management systems, automation tools, design assets, and custom development services.

Live URL:

<https://scrollzea2026.vercel.app>
<https://github.com/soulyantraheals/scrollzea2026>
[Vercel \(Pro\)](#)

2. Technology Stack

Layer	Technology	Version
Framework	Next.js (App Router)	15.5.1
Language	TypeScript	5.8.3
UI Library	React	19.1.0
Styling	Tailwind CSS	4.1.4
Database	Turso (LibSQL — SQLite)	via @libsql/client 0.14
ORM	Drizzle ORM	0.38.0
Authentication	NextAuth.js v5	5.0.0-beta.25
Password Hashing	bcryptjs	2.4.3
Icons	Lucide React	1.26.0
File Uploads	Uploadthing	7.0.0
Email	Resend	4.0.0
CSS Utility	clsx	2.1.1
Validation	Zod	3.23.0
PostCSS	@tailwindcss/postcss	4.3.3
CLI / Migrations	Drizzle Kit	0.30.0

ENVIRONMENT VARIABLES

<u>Variable</u>	<u>Purpose</u>
<code>TURSO_DATABASE_URL</code>	Turso database URL (local: <code>file:./scrollzea.db</code>)
<code>TURSO_AUTH_TOKEN</code>	Turso authentication token
<code>AUTH_SECRET</code>	NextAuth encryption secret
<code>AUTH_URL</code>	Auth callback URL
<code>RESEND_API_KEY</code>	Email API key (Resend)
<code>UPLOADTHING_SECRET</code>	File upload secret
<code>UPLOADTHING_APP_ID</code>	Uploadthing application ID
<code>LEAD_NOTIFICATION_EMAIL</code>	Lead notification recipient
<code>EMAIL_FROM</code>	Sender email address

3. Project Structure

```

scrollzea/
├── app/
│   ├── (public)/           # Public-facing pages
│   │   ├── about/         # About page

```

4. Database Schema (21 Tables)

The platform uses a Turso (LibSQL/SQLite) database with 21 tables managed through Drizzle ORM:

CORE TABLES

Table	Purpose	Key Fields
categories	Product categories	id, name, slug, icon, description, status, sortOrder
products	Digital products	id, name, slug, productType, price, discountPrice, status, featured, bestSeller
product images	Product images	id, productId, imageUrl, isPrimary, sortOrder
product features	Feature list per product	id, productId, feature, sortOrder
payment options	Payment methods per product	id, productId, provider, paymentUrl, enabled
faqs	Product-specific FAQs	id, productId, question, answer, sortOrder

CUSTOMER & ORDER TABLES

Table	Purpose	Key Fields
customers	Registered customers	id, name, email, phone, isGuest
orders	Purchase orders	id, orderNumber, customerName, productId, totalAmount, paymentStatus, orderStatus
favorites	Customer favorites	id, customerId, productId

LEAD & PROJECT TABLES

Table	Purpose	Key Fields
leads	Contact form submissions	id, name, email, phone, purpose, status
custom projects	Custom service projects	id, customerName, totalPrice, advanceAmount, projectStatus

ADMIN & ANALYTICS TABLES

<u>Table</u>	<u>Purpose</u>	<u>Key Fields</u>
admin_users	Admin accounts	id, email, passwordHash, name, role, status
click_events	Click tracking analytics	id, productId, eventType, source, referrer
website_settings	Site configuration	key, value
chatbot_settings	AI chatbot configuration	key, value

PRODUCT TYPES

The `products.productType` field supports four types:

- **[READY MADE](#)** — Fixed price, instant downloadable products
- **[FREE](#)** — Free products with lead capture option
- **[PREBOOK](#)** — Custom services with advance payment (30% default)
- **[CUSTOM QUOTE](#)** — Request-based pricing

PAYMENT PROVIDERS

- **[RAZORPAY](#)** — Indian payment gateway
- **[PAYPAL](#)** — International payments
- **[WHATSAPP](#)** — Manual WhatsApp-based payment

5. Route Architecture

PUBLIC ROUTES

Route	Type	Description
/	Dynamic SSR	Homepage with featured products, categories, search
/products	Dynamic SSR	Product listing with category filters + search
/products/[slug]	Dynamic SSR	Product detail page
/categories	Dynamic SSR	Category listing with product counts
/categories/[slug]	Dynamic SSR	Category-specific products
/freebies	Static	Free digital resources
/services	Static	Custom development services
/contact	Static	Contact form
/about	Static	About Scrollzea
/auth/login	Static	Customer login
/auth/register	Static	Customer registration
/account/favorites	Static (CSR)	User's favorite products
/account/orders	Static (CSR)	User's order history
/privacy	Static	Privacy policy
/terms	Static	Terms & conditions
/refund	Static	Refund policy

ADMIN ROUTES (PROTECTED)

Route	Type	Description
/admin	Static (CSR)	Admin login page
/admin/dashboard	Static (CSR)	Analytics dashboard with stats
/admin/products	Static (CSR)	Product CRUD management
/admin/products/new	Static (CSR)	Add new product form
/admin/products/[id]/edit	Dynamic SSR	Edit product form
/admin/categories	Static (CSR)	Category management
/admin/orders	Static (CSR)	Order management
/admin/leads	Static (CSR)	Lead management
/admin/customers	Static (CSR)	Customer list
/admin/projects	Static (CSR)	Custom project tracking
/admin/analytics	Static (CSR)	Click analytics
/admin/settings	Static (CSR)	Website settings

API ROUTES

Route	Method	Purpose
/api/products/search?q=	GET	Live product search suggestions
/api/products	GET	List all published products
/api/products/[slug]	GET	Product detail by slug
/api/categories	GET	List active categories
/api/settings	GET	Website settings
/api/contact	POST	Submit contact form
/api/track/click	POST	Track click events
/api/upload	POST	Upload images
/api/setup	GET	Admin initial setup
/api/seed	GET	Seed database with sample data
/api/seed/add-images	GET	Add product images
/api/admin/*	CRUD	Admin management APIs

6. Frontend Architecture

THEME SYSTEM

The platform implements a dual-theme system (dark/light) using CSS custom properties:

- **Default:** Light mode on page load
- **Dark Mode:** Optional toggle with localStorage persistence
- **CSS Variables:** 40+ custom properties for colors, borders, shadows, and typography
- **Theme Toggle:** Smooth transition between themes with classes toggle on `<html>` element

Key CSS Variables:

- `--bg-primary`, `--bg-secondary`, `--bg-card` : Background colors
- `--text-primary`, `--text-muted`, `--text-dim` : Text colors
- `--accent-gold`, `--accent-gold-light` : Gold accent colors
- `--border-gold`, `--border-gold-hover` : Border colors
- `--font-display`, `--font-body` : Typography

COMPONENT ARCHITECTURE

Components are organized into three layers:

1. **UI Components** (`components/ui/`) — Atomic, reusable: Button, Input, Modal, Badge, Card, EmptyState, LoadingSpinner
2. **Public Components** (`components/public/`) — Page-specific: Header, Footer, ProductCard, HomeSearchBar, ProductsSearchBar
3. **Admin Components** (`components/admin/`) — Admin-specific: AdminHeader, Sidebar, StatCard, ProductForm, ImageUploader, PaymentOptionsEditor

STYLING PATTERNS

- **Tailwind CSS v4** with `@theme` directive for brand tokens

- [Utility-first](#) approach with custom component classes
- **Animation:** Fade-in-up stagger animations for cards
- **Responsive:** Mobile-first with breakpoints at sm/md/lg/xl
- **Scrollbar:** Custom styled scrollbar matching theme

SEARCH SYSTEM

Real-time search with live suggestions implemented across three locations:

1. **Header** — Search icon expands to inline input on every page
2. **Homepage** — Prominent search bar with live dropdown suggestions
3. **Products Page** — Search bar with active query highlighting

How it works:

- User types ≥2 characters → fetches `/api/products/search?q=...`
- Server queries published products by name/description (LIKE match)
- Returns top 6 matches with name + price
- Dropdown shows results with "View all results →" link
- Click suggestion → navigates to product detail
- Press Enter → filters products page

7. Admin Panel

AUTHENTICATION FLOW

- [NextAuth.js v5](#) with JWT session strategy
- [Credentials provider](#) (email + password)
- [bcryptjs](#) password hashing
- [Admin routes protected by middleware cookie check](#)
- [Session persists across page reloads](#)
- [Auto-redirect to login if unauthenticated](#)

ADMIN FEATURES

Feature	Description
Dashboard	5 stat cards (Total Products, Published, New Leads, Orders, Revenue), Recent Orders & Leads tables
Products	Full CRUD with name, slug, description, pricing, images, payment options, SEO, status management
Categories	CRUD with name, slug, description, status, sort order
Orders	View orders with payment & order status tracking
Leads	Manage contact form leads with status workflow (new → contacted → qualified → converted → closed/spam)
Customers	View registered customers with guest/account distinction
Projects	Track custom service projects with payment progress and status
Analytics	Click tracking, sales data, top/bottom products, conversion rate
Settings	Site configuration (name, description, social links, emails, SEO, chatbot)

UI DESIGN

- [Grit-style dark theme](#) matching public site aesthetic
- [Gold accents](#) ([#D4AF37](#)) on dark backgrounds ([#071B14](#) , [#0D241D](#) , [#0F281F](#))
- [Sidebar with nav icons](#), responsive collapse on mobile
- [Consistent card-based layouts, tables, and form patterns](#)

8. Seeded Data

The platform includes scripts to seed the database with realistic sample data:

8 CATEGORIES

Category	Slug	Icon	Products
Mobile Apps	mobile-apps		4 products
Web Development	web-development		6 products
Design & Branding	design-branding		3 products
Desktop Software	desktop-software		3 products
E-books & PDFs	ebooks-pdfs		3 products
Social Media	social-media		2 products
AI & Automation	ai-automation		=
API & Backend	api-backend		=

21 PRODUCTS

Mobile Apps: [Expense Tracker Pro \(₹2,499\)](#), [Flutter Business Dashboard \(₹3,499\)](#), [Food Delivery App Template \(₹4,999\)](#), [Custom Android/iOS App \(₹25,000 - prebook\)](#)

Desktop Software: [Invoice Generator PDF Tool \(₹1,999\)](#), [Invoice Tracker Excel \(₹799\)](#), [Billing & Inventory System \(₹5,999\)](#)

Design & Branding: [Logo & Brand Identity \(₹8,000 - prebook\)](#), [Social Media Post Templates \(FREE\)](#), [Brand Style Guide \(₹1,499\)](#)

E-books & PDFs: [Minimal Resume Template \(FREE\)](#), [Business Plan Template \(₹999\)](#), [Digital Marketing Guide \(₹499\)](#)

Web Development: [Professional Website Design \(₹15,000 - prebook\)](#), [E-Commerce Store Setup \(custom quote\)](#), [Next.js Portfolio Template \(₹1,999\)](#), [Admin Dashboard Template \(₹2,499\)](#), [Hostel Management System \(₹9,999\)](#), [Hospital Management System \(₹14,999\)](#)

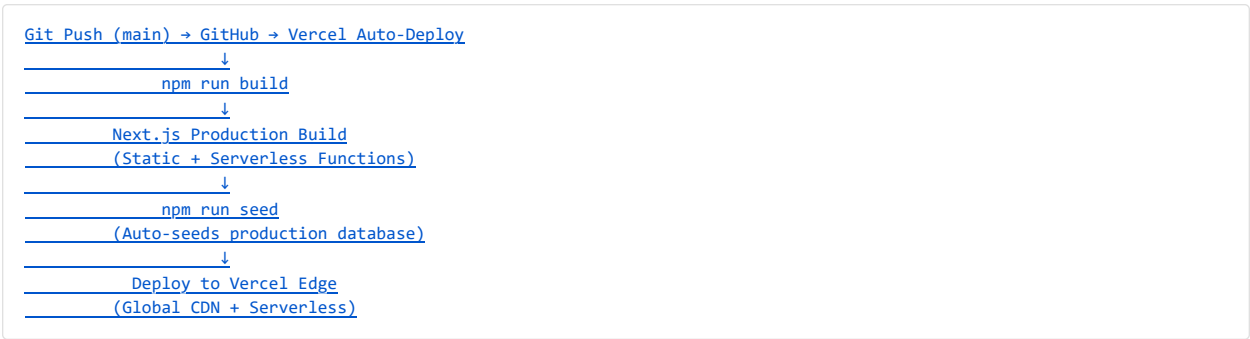

Social Media: [Ultimate Notion Dashboard \(FREE\)](#), [Instagram Carousel Templates \(₹499\)](#)

Images: [Each product has 2 professional Unsplash images relevant to its category.](#)

9. Security Architecture

Layer	Implementation
Admin Auth	NextAuth.js v5 JWT with bcrypt password hashing
Route Protection	Middleware checks auth cookie on /admin/* routes
API Validation	Server-side input validation on all endpoints
SQL Injection	Parameterized queries via Drizzle ORM
HTTPS	Enforced by Vercel deployment
Secrets Management	Environment variables via Vercel encrypted storage
CSRF	NextAuth.js built-in CSRF token protection
File Uploads	Uploadthing CDN (validated, scanned)

10. Deployment Pipeline

VERCEL CONFIGURATION

- **Framework:** Next.js (auto-detected)
- **Build Command:** npm run build
- **Output Directory:** .next
- **Node.js Version:** 24.x
- **Environment:** Production (encrypted vars)

DATABASE MANAGEMENT

- **Local Dev:** SQLite file (scrollzea.db) via file: protocol
- **Production:** Turso remote database (LibSQL) via HTTPS
- **Migrations:** Drizzle Kit (drizzle-kit push)
- **Seed:** npm run seed (both local and production)

11. Development Commands

```
npm run dev          # Start development server (localhost:3000)
npm run build        # Production build
npm run start        # Start production server
npm run lint         # Run ESLint
npm run seed         # Seed database with sample data
npm run db:push      # Push schema changes to database
npm run db:generate  # Generate Drizzle migrations
npm run db:studio    # Open Drizzle Studio (GUI)
npx vercel --prod    # Deploy to Vercel production
```

12. Key Design Decisions

WHY NEXT.JS 15 APP ROUTER?

- [Server-side rendering for SEO-optimized product pages](#)
- [App Router for nested layouts \(public vs admin routes\)](#)
- [Server components minimize client-side JavaScript](#)
- [API routes co-located with pages](#)

WHY TURSO (LIBSQL)?

- [SQLite-compatible for simple, reliable data storage](#)
- [Edge-ready with HTTP connection \(no persistent TCP\)](#)
- [Serverless-friendly \(no connection pooling needed\)](#)
- [Free tier for development, scales to production](#)

WHY DRIZZLE ORM?

- [Type-safe SQL with full TypeScript inference](#)
- [Lightweight compared to Prisma/TypeORM](#)
- [SQL-like syntax with programmatic query building](#)
- [Built-in migration tools \(drizzle-kit\)](#)

WHY GRIT-STYLE DARK THEME?

- [Professional, premium aesthetic for a digital products marketplace](#)
- [Gold accent conveys quality and trust](#)
- [Consistent branding across public site and admin panel](#)
- [Light/dark toggle gives user control over experience](#)

13. Scripts & Automation

SEED-ALL.MJS

[Full database seeder that:](#)

1. [Creates 8 categories with icons and descriptions](#)
2. [Creates 21 products with pricing, types, and category assignments](#)
3. [Adds product features for free products](#)
4. [Creates payment options \(Razorpay, PayPal, WhatsApp\) for paid products](#)
5. [Skips existing records \(idempotent\)](#)

SEED-PRODUCTS.MJS

[Legacy product-only seeder \(requires existing categories\).](#)

API SEED ENDPOINTS

- [GET /api/seed](#) — Seed categories + products (idempotent)
- [GET /api/seed/add-images](#) — Add 2 Unsplash images to each product
- [GET /api/setup](#) — Create admin account and default settings

14. Admin Credentials

LOCAL DEVELOPMENT

- **Setup Endpoint:** http://localhost:3000/api/setupSMARTPANTS_RESERVED_1585SMARTPANTS_RESERVED_1586
- **Email:** scrollzea@gmail.com
- **Password:** scrollzeaAdmin2024!
- **Admin URL:** http://localhost:3000/adminSMARTPANTS_RESERVED_1601SMARTPANTS_RESERVED_1602

PRODUCTION

- **Setup Endpoint:** https://scrollzea2026.vercel.app/api/setupSMARTPANTS_RESERVED_1611SMARTPANTS_RESERVED_1612
- **Email:** scrollzea@gmail.com
- **Password:** scrollzeaAdmin2024!
- **Admin URL:** https://scrollzea2026.vercel.app/adminSMARTPANTS_RESERVED_1627SMARTPANTS_RESERVED_1628

15. Future Roadmap

Feature	Priority	Description
Customer Cart & Checkout	High	Full shopping cart with Razorpay/PayPal integration
Customer Registration	High	User accounts with order history & favorites
Email Notifications	Medium	Order confirmations, lead notifications via Resend
AI Chatbot	Medium	Product recommendations, FAQ answering
Multi-language Support	Low	i18n for international customers
Blog / Content CMS	Low	Marketing blog with SEO content
Discount Coupons	Low	Promotional code system
Reviews & Ratings	Low	Customer product reviews

16. File Reference

<u>File</u>	<u>Lines</u>	<u>Purpose</u>
app/page.tsx	~400	Homepage (server component with DB queries)
app/globals.css	~250	Theme variables, animations, component styles
db/schema.ts	~206	Complete database schema (21 tables)
lib/auth.ts	~75	NextAuth configuration
middleware.ts	~34	Admin route protection
components/public/Header.tsx	~155	Navigation, search, theme toggle
components/admin/ProductForm.tsx	~390	Product CRUD form
components/public/HomeSearchBar.tsx	~120	Live search with suggestions
app/api/seed/route.ts	~200	Database seeding API
scripts/seed-all.mjs	~170	Full seed script

Total source files: ~85

Total lines of code: ~8,000+
